(LinkedIn: <https://www.linkedin.com/in/khokon-barua/>)

QUALIFICATIONS STATEMENT

IT Support and Computer Science student at Ohio Wesleyan University with a strong foundation in software development, data analysis, and system reliability. Bringing proven leadership as the founder of multiple campus organizations, a hackathon award winner, and a student representative in AI governance. Background combines hands-on technical problem-solving with real-world IT operations supporting 1,000+ students and faculty. Eager to apply expertise to IT Support or entry-level Software Engineering roles.

EDUCATION

Ohio Wesleyan University, Delaware, OH

Expected May 2029

Bachelor of Arts / Computer Science Majors

GPA 3.89

- Honors/Awards: Tab Director Western IV 2025 | IMO Malaysia 2024 | Schubert Scholarship | Honors Student | Dean's List
- Certification: Google Data Analytics, Google AI 2025

COURSEWORK

Computer Science: Terrain Generation | Algorithm Analysis & Design | A.I. | Theory of Computation | Database Systems | Paradigms of Computation | Computer Organization | Algorithms & Data Structures

Mathematics: Linear Algebra | Differential Equations | Biostatistics | Discrete Math | Calculus II

Programming Language Experience: C++ | Python | SQL | Git | React Native | Node.js | Firebase | Linux

IT & Systems: IT Support | Hardware & Software Troubleshooting | Helpdesk Systems | Network Basics | LMS & Classroom Technology | Ardupilot

WORK EXPERIENCE

ByteWright LLC | Remote | Software Development Intern

June 2026 – Present

- Develop and maintain AI automation tools and client-facing web applications using React, Node.js, and LangChain-based pipelines.
- Collaborate with cross-functional team members on product scoping, development cycles, and client delivery.
- Contribute to backend architecture and AI feature integration across multiple active projects.

IT Technician | Ohio Wesleyan University | *IT Support Technician*

January 2025 – Present

- Manage a weekly volume of 50+ IT support requests, maintaining 95%+ service availability across systems.
- Provide real-time technical support for 15+ campus-wide events per semester, supporting 100–300 students and faculty per event with minimal downtime.
- Conduct routine device checks across 10+ labs and 25+ classrooms, reducing recurring service interruptions by ~20%.

Calico Tabbycat | Remote | *Tech Intern*

Dec 2023 – Dec 2025

- Ensured 100% scoring accuracy across 1,000+ debate tournaments and 50+ national-level events by managing scoring logic, rankings, and data verification.
- Reduced tabulation errors by ~30% and processing time by 25% by optimizing templates and streamlining data workflows.
- Identified and resolved 10+ system inconsistencies, implementing structured fixes that improved platform reliability for thousands of participants.

OnlySwap | *Founding Team & Lead Developer*

Dec 2025 – Present

- Founded a student-only trading app for iOS and Android, winning 2nd place (\$2,000 prize) at Princeton University Hackathon.
- Developed using React Native, Node.js, and Firebase; grew to 245+ users and 25+ trades within two weeks of launch.

LEADERSHIP AND CAMPUS INVOLVEMENT

OWU AI Workforce | *Student Representative*

Dec 2025 - Present

- Actively lead communications between IFC, Panhellenic Council, and the OWU community.
- Collaborate with faculty and administrators across 3+ departments to support inclusive and effective AI policy formation.

Debate Club | Ohio Wesleyan University | *Founding President*

Dec 2025 – Present

- Founded the university Debate Club, recruiting 20+ active members within the first semester.
- Organized and led 5+ campus events, coordinating logistics, scheduling, and inter-organization collaboration.

Robotics Club | Ohio Wesleyan University | *President*

Dec 2025 – Present

- Lead 15+ active members, running 2+ sessions per week and overseeing inter-competition preparation.
- Designed and built a fully functional flying drone, demonstrating hands-on engineering and hardware skills.

PROJECT EXPERIENCE

PDF Knowledge Base — RAG AI Application | Personal Project | May 2026

- Built an end-to-end RAG pipeline using LangChain, ChromaDB, and LLaMA 3.2, enabling natural language Q&A over PDF documents with source attribution.
- Implemented semantic search using Sentence Transformer embeddings for accurate chunk retrieval across indexed documents.
- Deployed Streamlit chat interface with conversation memory, intent detection, and cited source display.
- Ran entire AI stack locally using Ollama — zero API cost, full data privacy.

Meeting Notes Auto-Summarizer | Personal Project | June 2026

- Built an AI meeting summarizer using Facebook's BART-large-CNN model via HuggingFace Transformers, processing long-form text into structured summaries.
- Implemented an intelligent text chunking pipeline to handle documents exceeding model token limits without loss of context.
- Automated extraction of action items, deadlines, and attendees using NLP keyword detection across meeting transcripts.
- Deployed an interactive Streamlit web app supporting both text paste and .txt file upload with one-click summary download.

Campus Room Booking System | Ohio Wesleyan University | *Academic Project*

Dec 2025 – Present

- Designed and developed a centralized room booking system supporting 15+ academic departments and 1,000+ users.
- Implemented structured request–approval workflows that improved booking accuracy by ~30% and reduced scheduling conflicts.
